

Don't throw it away,  
it can be used in some other way...

## PROJECT OASIS

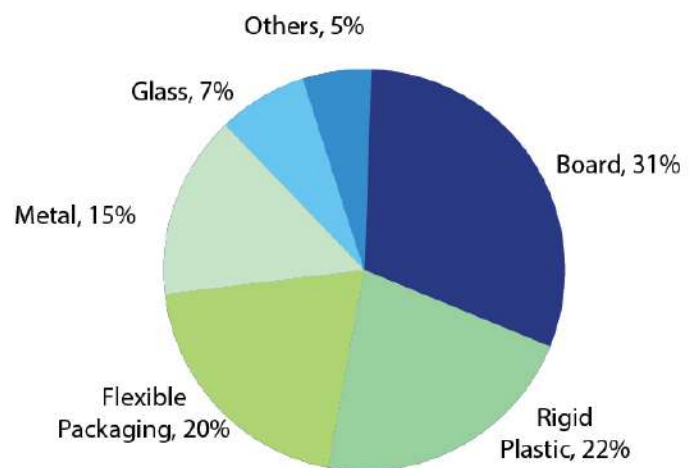

Project Oasis is Uma Group's commitment & resolve to protect the environment, by adopting eco-friendly processes to reduce plastic pollution through effective plastic waste management.

anything from  
**Waste**

## Facts

- Being the most popular option for light weight packaging like Snacks, beverages, pharmaceuticals, personal care and household. Packaging segment holds the highest consumption of plastic at 43% , within which flexible packaging holds 20% (Approx.)
- The multi-layered laminated plastic contains multiple inseparable thin layers of different grades of plastics to maintain its properties which makes its recycling challenging.

## About Project Oasis

Project Oasis is focused on recycling and producing products that have utility value in most needed areas.

Along with plastic waste generated at our units, market consumed laminate waste is recycled and converted into utility products for various end uses like -

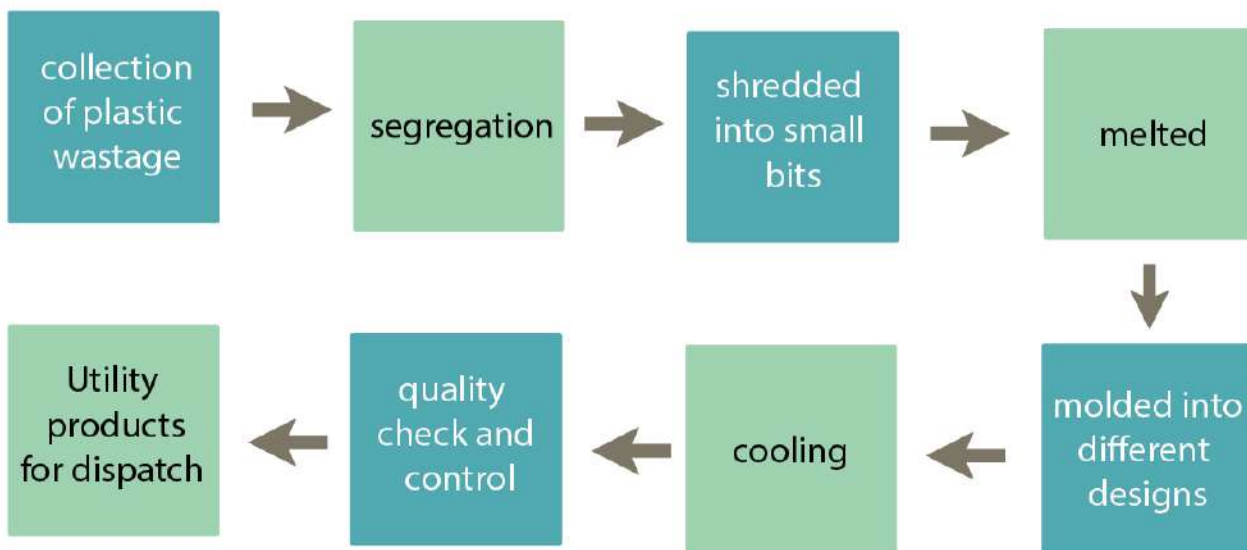

Making of 1 Stool = 833 Wrappers of Chocolates are processed,  
 Making of 1 Flower Pot = 8080 grams of discarded plastic are processed

## Impacts

Project Oasis impacts economically, socially and environmentally. Manufacturing of various 2nd grade products out of wastage, helps reduce plastic wastage and simultaneously generates revenues through their sale. With the development in the sector of plastic waste management the employment generation increases.

Maintaining effective plastic waste management results in lowering pollution and increasing hygiene levels. With using the most discarded material i.e. multi-layered laminated wastage, it also helps in improving the quality of air, land and water.
